Technical Information Sheet

PREMIERE CARVING WAX

Premiere Carving wax is specifically formulated with the sculptor in mind. It is designed to deliver ease of carving yet will retain fine detail.

IMPORTANT

Avoid overheating the wax (100°C max) or holding it at elevated temperatures for long periods. Doing so will thermally degrade the product. Avoid skin contact with the molten material and avoid inhaling fumes from it; see the relevant Material Safety Data sheet for more information.

TYPICAL PROPERTIES

Property	Method	Minimum	Maximum	Typical Value
Softening Point (°F)	IP. 58	160	175	-
Melting Point (°C/°F)	IP. 371	-	-	75/167
Penetration @ 77°F (dmm)	ASTM D1321	11	15	-
Ash Content (% w/w)	DCF. 2	-	0.030	-
Colour	DCF. 4	-	-	Natural
